

A totally integrated solution for Home, Business, Hospitality, Care and Industry.

RainSafe™ uses **patented H₂Ozone Technology** to provide a **chemical-free** purification solution for all water sources to independently verified drinking water standards.

RainSafe™ offers 24/7 365-day guaranteed pure drinking water solutions for:

- **Residential Premises**
 - **Commercial and Office Premises**
 - **Hospitality, Restaurants and Pubs**
 - **Nursing Home and Cleaning Services**
 - **Medical and Dental Practices**
 - **Schools, Colleges and Sports Halls**
- ... **Anywhere that requires 24/7 365-day guaranteed pure drinking water.**

The unique benefits of RainSafe™

- **Proven, advanced patented technology**
- Water is sourced from your own rain-harvesting system, wells, surface water, boreholes or municipally supplied water.
- **RainSafe™** is the only **chemical-free** water purification system available which inactivates all pathogenic organisms from your water supply, including ***E.coli***, ***Salmonella***, ***Legionella*** bacteria and the ***Cryptosporidium oocyst***.

Safe water for home and hospitality

Testimonials from satisfied RainSafe™ customers

“ This is a technology we have been looking for. It is innovative, simple, easy to maintain and yet effective in treating water to drinking standard without the use of complicated filters or chemical agents. This is an eco friendly, cost effective solution every householder should consider. “

Valeco - Belgian National Distributor

“ We were having issues with the quality of our water, with no resolution in sight and used a huge amount of bottled water per week. We installed the Rainsafe unit and the results have been outstanding. We now have clean, pure, chemical-free water and never have to worry about a boil water notice again. I would have no hesitation in recommending this technology to anyone who wants consistent, pure water.“

Domestic client - Tom Turley

“ We installed the machine to ensure we have clean pure water for the preparation of food and also as drinking water. We especially like the fact that it is chemical-free and is easy to manage.“

Peter Norton - Poppies Restaurant, Enniskerry
